In the pastures and mowing grounds, the grass withered and died in early Summer, under the heat. Mulitudes, to the number, it is computed, of thirty thousand, have left the Territory to seek subsistence in the States; multitudes yet remain, who have neither the means of emigrating, nor movey to procure food from the region to the north and east of them, whate the crops have been abundant. It is estimated that thirty thousand people are in this dreadful condition, many of whom, if not soon relieved, must fleenily de of stavation, and many more must perish by the diseases which accompany a famine.
